Wann	Di, 13. November 2012, 08:30 h - 16:30 h

Beschreibung

8th Workshop Asphere Metrology

german version (currently not available)

After several very interesting events on topic asphere metrology we continue with our new workshop. You can find a review of our last events with topic asphere metrology [HERE](#), [HERE](#) and [HERE](#).

Currently the active participants perform their measurements. All periods for measurements are assigned. Are you interested in a active participation (with measurements) or do you like to give a theoretical contribution? - Don't hesitate to contact us, we will put you on the waiting list!

Our 8th Workshop with topic asphere metrology will take place on November 13th 2012 at PTB in Braunschweig, Germany. Once again a comparison measurement of reference aspheres is scheduled in preparation of the workshop. Of course the measurement results will be presented during the meeting. As during our HLEM 2012 now even more precise samples with even higher requirements will be used. (During our Workshop 2012 the same aspheres as during HLEM 2012 will be used.) The picture shows both aspheres which are examined by the participants.

Additionally theoretical contributions will complete the programme.

Of particular interest: The comparison of measurement systems and measurement results.

We would like to invite all professionals and users from research and industry as well as manufacturers of measuring instruments to join this meeting. However - we keep you up to date - more information will be published here regularly.

You receive the FLYER of our upcoming workshop by [following this link](#).

[illegible]

Here you find the [detailed programme](#) of our meeting.

You will find a overview of all downloadable files of this event in our [download area](#).
