International Microprocesses and Nanotechnology Conference (MNC 2025)

Event - International Microprocesses and Nanotechnology Conference (MNC 2025) ↻

Title	International Microprocesses and Nanotechnology Conference (MNC 2025)
When	Mo, 17. November 2025 - Do, 20. November 2025

Description

38th - International Microprocesses and Nanotechnology Conference (MNC 2025)

Microprocesses and Nanotechnology play an important role of technical backbone for constructing the advanced information communications society with ubiquitous net works of the 21st century. The MNC conference is now in its 35th year and is intended to provide a forum for discussing lithography science and process technology using photon, electron, ion, other energetic particles and nanomaterials. This conference covers not only their applications to micro-and nano-structure fabrication and related physics and devices, but also their fusion applications with other fields like bio, medical information, and communication technology.

The Conference ist about following topics:

SCOPE

1: Lithography, Metrology and Related Technologies

1-1: Advanced Lithography and Patterning

1-2: Electron and Ion Beam Technologies

1-3: Patterning Materials

2: Nanotechnology

2-1: Nanocarbons & 2D Materials

2-2: Nanodevices

2-3: Nanofabrication

2-4: Inorganic Nanomaterials

2-5: Organic Nanomaterials

2-6: Nano Surfaces, Interfaces, and Advanced Nano Metrology

3: Nanoimprint, Hybrid-NIL, Biomimetics, and Functional Surfaces

4: BioMEMS, Lab on a Chip, and Nanobiotechnology

5: Microsystem Technology and MEMS

6: Atomic Layer Processing (ALP)

Symp. A: Evolving Challenges in Lithography in the AI Era

Symp. B: Process and Device Technologies for Quantum Computing III

Symp. C: Innovative Technology for Bio Applications
