Wann	Mi, 10. März 2010 - Do, 11. März 2010

Beschreibung

4th UPOB - High Level Expert Meeting (HLEM) 2010 -

Asphere Metrology
Joint Investigation

Info: [flyer](#) [program](#) [German Version](#)

Aspheres - whether as an aid for poor eyesight, in mobile phones or large optics - are in use all around us. As widespread their applications are, as difficult it is to produce or to measure them precisely. This is revealed by today's practise, where sometimes large measurement uncertainties emerge.

Focal points of the Expert Meeting:

- What is the state of the art today?
- Which procedures have which advantages?
- Are there new approaches to improve existing techniques significantly?
- In which direction should new developments be supported?

Questions like the ones above can be addressed by experts only. The High-Level Expert Meeting, organised by the Kompetenzzentrum Ultrapräzise Oberflächenbearbeitung (CC UPOB e.V.), i.e. the competence centre for ultra-precise surface figuring, aims to bring together these experts from industry and research, developers and users to start the dialogue.

Theoretical papers introduce in asphere metrology. Two selected aspheres were investigated by fourteen companies and institutes.

For further information please look at our flyer, the program or the german version. Or please [contact](#) us. The conference dinner will be held at the [Gewandhaus](#) in Braunschweig on wednesday, March 10th, starting at 7 pm.

Lokalität - Physikalisch-Technische Bundesanstalt (PTB)

Standort	Physikalisch-Technische Bundesanstalt (PTB)
Straße	Bundesallee 100
Postleitzahl	38116
Ortsname	Braunschweig
Bundesland	Niedersachsen
Land	DE
