

OSA Frontiers in Optics + Laser Science APS/DLS

Veranstaltung - OSA Frontiers in Optics + Laser Science APS/DLS

Titel	OSA Frontiers in Optics + Laser Science APS/DLS
Wann	So, 16. September 2018 - Do, 20. September 2018

Beschreibung

OSA Frontiers in Optics + Laser Science APS/DLS

The meeting unites [The Optical Society \(OSA\)](#) and [American Physical Society \(APS\)](#) communities for five days of quality, cutting-edge presentations, fascinating invited speakers and a variety of special events. The conference was thoughtfully revised, combining the best of the past and adding vital, innovative elements.

The topics of this conference are:

Conference Themes

The Technical Conference is now organized around four themes that leverage the intersection between science and applications— the end result is intended to illustrate the research within the technology. The four themes:

- Automotive
- Nanophotonics and Plasmonics
- Quantum Technologies
- Virtual Reality and Augmented Vision
