

NAMBE 2022 - 36th North American Conference on Molecular Beam Epitaxy

Veranstaltung - NAMBE 2022 - 36th North American Conference on Molecular Beam Epitaxy ^u

Titel	NAMBE 2022 - 36th North American Conference on Molecular Beam Epitaxy
Wann	So, 18. September 2022 - Mi, 21. September 2022

Beschreibung

NAMBE 2022 - 36th North American Conference on Molecular Beam Epitaxy

The 36th North American Conference on Molecular Beam Epitaxy (NAMBE 2022) is a prominent international forum for reporting scientific and technological developments in Molecular Beam Epitaxy research.

The conference shows important results from fundamental materials and device research, through technological applications, and into high-volume and low-cost production. In addition to a diverse technical program, vendors will exhibit the latest equipment available for material growth and characterization. The exhibit will surround the coffee breaks and poster presentations, providing many opportunities for discussions between attendees and vendors.
